

RUST SHOCK – COLD SHOCK SPRAY

Features

- cold shrinkage breaks the rust crystals and dissolves therefore the rust layer
- cools components within a few seconds
- dissolves rust very quickly thanks to a cold shock (-45°C)
- silicone-free and grease-free
- residue-free
- 360°-valve, can be used upside down

Areas of application

PETEC rust shock - with cold shock effect - for quick loosening of seized connections (screws, nuts, bolts) such as those on an exhaust, manifold, track rod, lambda probe and many more.

TechnicalData

Shelf life	36 Months
------------	-----------

Usage Instructions

Shake can well before use. Remove excess material with a wire brush. Spray PETEC rust shock onto the entire surface of the seized parts and loosen the fitting after a few seconds. Read the safety and technical data sheet! (Download the PETEC data sheets from www.petec.de)
