- low weight and very handy
- uniform application
- structures can be sprayed and readjusted
- operating pressure 3–6 bar

Areas of application

TechnicalData

Working pressure	3-6
Shelf life	Months

Usage Instructions

Screw the underbody protection gun onto the vacuum can and set the prescribed working pressure. The spray pattern and structure can be adjusted by means of the working pressure, spray distance and the cone of the underbody protection gun. After use, the underbody protection gun must be unscrewed and roughly cleaned with a cloth. Then insert the underbody protection gun into the PETEC Multi Cleaner (item no. 82100) can and clean the spray system with 2-3 sprays.
