

# AIR CONDITIONING CLEANER SPRAY, LEMON FOAM

## Features

- intensive foam cleaning
- easy to use
- silicone-free
- with 60 cm spray tube
- 360°-valve, can be used upside down

## Areas of application

Cleans the entire air conditioning and heating system. The vehicle interior will be refreshed with a long-lasting effect.

## TechnicalData

Shelf life	36 Months
------------	-----------

## Usage Instructions

Shake can well before use. If necessary, replace the pollen filter. Ensure that the air conditioning overflow is not clogged allowing the liquefied foam to disappear via the drain. Switch off all electronic equipment. Apply PETEC air conditioning cleaner foam to the condenser (evaporator) of the air conditioning system. Insert the adapter or extension tube into the air intake or ventilation system of the air conditioning system. The position of the air intake depends on the brand and the can contents must be adjusted to the ventilation system of the vehicle. After the application do not turn on the air conditioning system and the fan for at least 30 minutes. Do not spray on exposed sensors, circuit boards or other electronic components. The spray tube must be correctly positioned in the ventilation system. Start the engine. Set the air conditioning system to the maximum power and ventilate the vehicle well. Read the safety and technical data sheet! (Download the PETEC data sheets from [www.petec.de](http://www.petec.de))

## Package Sizes

<b>Item no.: 71350</b>
500 ml
