

FREEZE COLD SPRAY

Features

- · cools components within a few seconds
- · for servicing and during setup
- cools down to -45°C

- residue-free
- silicone-free and grease-free

Areas of application

PETEC cold spray for troubleshooting in electronics as well as for cooling structural parts such as bearings, shafts, bushings, keys, links, carburettor and fuel-injection units, transistors, resistors and other parts with the narrowest of clearances. It can also be used for cooling very hot parts.

TechnicalData

Colours	clear
Shelf life	36 Months

Usage Instructions

Shake can well before use. Spray PETEC cold spray evenly onto the components. The cooling effect depends on the spraying time. Do not spray on parts of your body. Read the safety and technical data sheet! (Download the PETEC data sheets from www.petec.de)

Package Sizes

Our technical application advice, whether verbal, in writing, or based on tests, is provided to the best of our current knowledge. However, it does not release you from the obligation to independently verify the suitability of the products we supply for the intended processes and purposes. The application, use, and processing of the products are beyond our control and therefore fall solely within your area of responsibility.
