Usage Instructions

Shake can well before use. Spray the foam cleaner on the contaminated surface from a distance of approx. 20 cm and let it act (contact time depends on the application and soiling grade). Then rub off with a clean cloth or spray off with a steam jet. Repeat the procedure several times in case of heavy soiling. In the food industry treated surfaces must be rinsed off with potable water. Do not spray onto hot parts! Before use, check the material for colour fastness on a hidden area! Read the safety and technical data sheet! (Download the PETEC data sheets at www.petec.de)
