

DIESEL SYSTEM CLEANER

Features

- cleans
- lubricates
- protects
- maintains
- simple, fast and effective application via the fuel tank
- saves fuel and increases efficiency through finer atomisation of the fuel and therefore more efficient combustion
- protects against wear, corrosion and the spread of micro-organisms
- reduces soot formation, improves exhaust emissions and extends service life

Areas of application

Premium additive for the entire fuel system, improves ignition capability and increases efficiency. PETEC Diesel System Cleaner dissolves dirt & resins and cleans the fuel system (tank, lines, spray nozzles, combustion chamber and much more) in diesel engines. Also suitable for modern injection systems such as common rail and pump nozzle. Increases the lubricant effect of low-sulphur fuels.

TechnicalData

Shelf life	36 Months
------------	-----------

Usage Instructions

Shake well before use. Open the can, unscrew filling funnel if necessary and pour content into fuel tank. 300 ml of cleaner is sufficient for approx. 40 - 60 litres of fuel. The minimum fuel volume must not be less than 10 litres. The amount of cleaner must be adjusted to the total amount of fuel in the system, depending on the tank volume. We recommend regular application as a preventive measure. Follow the vehicle manufacturer's instructions and read the safety and technical data sheet. (Download the PETEC data sheets at www.petec.de)
